Technical	SQL (Intermediate), AMPscript (Working Knowledge), HTML/CSS for Email, SSJS (Basic)
Analytics & Performance	Campaign Performance Tracking, KPI Analysis (Open Rate, CTR), Google Analytics, Campaign Manager 360
CRM & Integrations	Salesforce CRM, Sales Cloud (Basics), REST/SOAP APIs (Basic Understanding)
Compliance & Data Management	CAN-SPAM, GDPR, CCPA, Subscriber & Preference Management

PROFESSIONAL EXPERIENCE

Infrastructure Analyst | DXC Technology | Bengaluru, India | Mar 2023 – Nov 2024

- ▶ Managed enterprise infrastructure across 8 global data centres, building transferable skills in large-scale system reliability and automation applicable to CRM and marketing environments
- ▶ Administered 10,000+ physical and virtual servers maintaining 99.9% uptime — directly translating to reliable campaign delivery pipelines and always-on CRM environments
- ▶ Led deployment of 800+ servers and directed migration of 7,000+ virtual machines with zero data loss, showcasing strong project management and meticulous data governance
- ▶ Reduced deployment time by 40% through standardised automation templates — the same automation mindset applied to streamlining Marketing Cloud journey flows and campaign workflows
- ▶ Coordinated global stakeholders across multiple time zones and produced detailed documentation and reporting for operations, building capabilities in campaign performance tracking and process optimisation

SALESFORCE MARKETING CLOUD PROJECTS

Hands-on implementation using Salesforce Marketing Cloud environment and sample datasets

Customer Journey & Campaign Execution

- ▶ Designed and built multi-step customer journeys (onboarding, nurture, re-engagement) using Journey Builder with decision splits, engagement-based logic, and re-entry criteria
- ▶ Created targeted audience segments using Data Extensions and behavioural rules to deliver personalised messaging
- ▶ Developed responsive email campaigns using dynamic content, AMPscript logic, and HTML/CSS templates
- ▶ Simulated campaign performance tracking, analysing open rates and click-through rates to optimise messaging and timing

Marketing Automation & Data Workflows

- ▶ Built automation workflows in Automation Studio using SQL queries, scheduled data updates, and import/export processes
- ▶ Reduced manual campaign processes through automated segmentation and data refresh workflows
- ▶ Designed relational data structures in Contact Builder to support accurate audience targeting
- ▶ Worked with REST and SOAP APIs for triggered sends and subscriber data updates (project-based implementation)

Campaign Optimisation & Analytics

- ▶ Conducted A/B testing on subject lines and content variations to evaluate engagement performance
- ▶ Applied best practices for email deliverability, send timing, and audience targeting
- ▶ Used Analytics Builder concepts to monitor campaign engagement and identify optimisation opportunities
- ▶ Implemented compliance practices including unsubscribe handling, consent tracking, and preference centre configuration

SALESFORCE DATA CLOUD PROJECT EXPERIENCE

Data Modelling & Ingestion

- ▶ Configured Data Cloud data structures including Data Streams, Data Lake Objects (DLOs), and Data Model Objects (DMOs)
- ▶ Built ingestion mappings to integrate Marketing Cloud and external datasets into unified customer profiles
- ▶ Applied batch and streaming ingestion concepts in project scenarios

Identity Resolution & Unified Profiles

- ▶ Configured identity resolution rules to unify customer records across multiple data sources
- ▶ Defined match and reconciliation rules to prioritise and merge profile attributes

Segmentation & Activation

- ▶ Created audience segments using attribute-based filters and calculated insights
- ▶ Activated segments into Marketing Cloud for campaign targeting and journey entry
- ▶ Applied data governance principles including consent management and data classification

VOLUNTEERING & INTERSHIPS

Volunteer | Project Management Institute Queensland (PMIQ) | Brisbane, Australia | Current

- ▶ Supported event and community initiatives by assisting with coordination and planning activities
- ▶ Assisted in organising member engagement events, strengthening stakeholder communication and collaboration skills
- ▶ Contributed to logistics and scheduling support for volunteer-led initiatives
- ▶ Gained exposure to structured project planning and execution practices in professional environments

HR Assistant & Talent Acquisition Intern | Shine Projects / The Sparks Foundation | Remote | 2021 – 2022

- ▶ Designed structured candidate engagement workflows and communication sequences, demonstrating ability to build journey-style communication flows
- ▶ Implemented feedback tracking systems to improve hiring efficiency, showcasing skills in data collection, reporting, and process optimisation
- ▶ Coordinated communication between students, mentors, and management teams across distributed environments, strengthening stakeholder management and organisational skills

EDUCATION

Bachelor of Technology | Aditya Institute of Technology and Management, India | Graduated 2022

LEADERSHIP & RECOGNITION

- ▶ University Innovation Fellow – Stanford d.school
- ▶ AIESEC Global Youth Leadership Program
- ▶ President – Women's Association (Elected)
- ▶ Brand Ambassador – Aspire 2020
